

Town of White Lake
Wastewater Report
Fiscal Year 2018

The Town of White Lake has approximately 2500 sewer connections. Several of these connections are multiple connections for businesses, motels and campgrounds.

The Town has performed several inspections and tests of the sewer system in an effort to locate needed repairs and have made simple point repairs to help eliminate inflow problems. The Town's engineering firm has designed plans to repair and/or replace outdated sewer lines during a sewer infrastructure rehab project scheduled to begin at the end of the 2018/19 fiscal year with construction starting in early fall.

The Town of White Lake provides wastewater services at an affordable cost while managing our program in a financially sustainable manner. We never lose site of the inevitable health and environmental cost of failing to insure that the Town's wastewater options have sufficient financial resources to protect the public.

Questions or concerns should be directed to Tim Frush, Public Works Director at 910-862-4800. The Town of White Lake holds a public meeting the second Tuesday of each month at 7:00 pm in the Council Chambers at 1879 White Lake Dr., White Lake, NC.
