Fire Department**

**DALE BRENNAN, FIRE CHIEF**

**MEDIA RELEASE**

**WATER SHUTTLE TRAINING**

The Town of White Lake Fire Department will be conducting Water Shuttle Training on September 9, 11, 16, and 18, 2019 in preparation for the OSFM Insurance Rating Inspection on September 23 and 24, 2019. Some issues may arise during the training such as a temporary drop in water pressure or a temporary change in the color of the water.

**Brown Water**

Some water pipes can accumulate deposits on the inside of the pipe wall. Most of the time, this is not a problem, but changes in water pressure, flow direction or the use of fire hydrants can cause these deposits to break loose and dissolve in the water, resulting in discoloration.

Although unpleasant, it's temporary and not harmful. If you have discolored water you should let your cold water faucet run until the water appears clear. If the problem persists, contact the Public Works Water and Sewer Department during regular business hours at 910-862-4800 or the afterhours number at (910) 862-8181.

The Town of White Lake Fire Department appreciates your understanding and cooperation during the training exercises and the inspection.
